

Subscription rates

Subscription rates for volume **46** (2009) of *Journal of Applied Probability (JAP)* are as follows (post free and including online access at <http://projecteuclid.org/jap/>): US\$384.00; A\$402.00; £186.00 for libraries and institutions; or US\$128.00; A\$134.00; £62.00 for individuals belonging to a recognised scientific society. The subscription rates for volume **41** (2009) of *Advances in Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 272 9782; email s.c.boyles@sheffield.ac.uk). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

Notes for contributors

Research papers are published in both the *Journal of Applied Probability (JAP)* and *Advances in Applied Probability (AAP)*, with longer papers usually appearing in *AAP*. In addition, *JAP* publishes short communications of a few printed pages in the nature of notes and letters specifically related to papers that have appeared in *JAP*. Review papers and papers in *stochastic geometry and statistical applications* are published in *AAP*.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2000 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the L^AT_EX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files (with hard copy back-up). All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is l.nash@sheffield.ac.uk. Authors should also submit one hard copy to the Executive Editor, as above.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/09

PRINTED IN EUROPE BY INFORMATION PRESS, OXFORDSHIRE

Research Papers

- 609 CHRISTIAN BENDER AND TINA MARQUARDT. Integrating volatility clustering into exponential Lévy models
- 629 MICHAEL R. TEHRANCHI. Asymptotics of implied volatility far from maturity
- 651 S. C. P. YAM, S. P. YUNG AND W. ZHOU. Two rationales behind the ‘buy-and-hold or sell-at-once’ strategy
- 669 ETIENNE PARDOUX AND MAJID SALAMAT. On the height and length of the ancestral recombination graph
- 690 SANDA N. SOCOLL AND A. D. BARBOUR. Local limit approximations for Markov population processes
- 709 XIAOYU XING, WEI ZHANG AND YONGJIN WANG. The stationary distributions of two classes of reflected Ornstein–Uhlenbeck processes
- 721 SHIBIN ZHANG AND XINSHENG ZHANG. On the transition law of tempered stable Ornstein–Uhlenbeck processes
- 732 SHAI COVO. On approximations of small jumps of subordinators with particular emphasis on a Dickman-type limit
- 756 SERGEY FOSS, DMITRY KORSHUNOV AND STAN ZACHARY. Convolutions of long-tailed and subexponential distributions
- 768 SØREN ASMUSSEN. Importance sampling for failure probabilities in computing and data transmission
- 791 ROMUALD ELIE. Double kernel estimation of sensitivities
- 812 SAUL JACKA. Markov chains conditioned never to wait too long at the origin
- 827 RAFIK AGUECH. Limit theorems for random triangular urn schemes
- 844 CHARLES BORDENAVE, SERGUEI FOSS AND VSEVOLOD SHNEER. A random multiple-access protocol with spatial interactions
- 866 THIERRY HUILLET AND MARTIN MÖHLE. Duality and asymptotics for a class of nonneutral discrete Moran models
- 894 KRZYSZTOF JASIŃSKI, JORGE NAVARRO AND TOMASZ RYCHLIK. Bounds on variances of lifetimes of coherent and mixed systems

Short Communications

- 909 GWO DONG LIN AND JORDAN STOYANOV. The logarithmic skew-normal distributions are moment-indeterminate
- 917 DIDIER PIAU. Asymptotics of iterated branching processes
